The return on investment began almost immediately because we communicate more efficiently with hospital departments, physicians and other providers. We used to waste hours on the telephone, standing at the fax machine, completing order forms and charge tickets, but not anymore. StarLab has put an end to wasted time in our laboratory.

Starlab increased our efficiency by two-fold. Physicians are so happy with the turnaround and the readability of the reports that they are using us more. Our lab revenues are increasing 10-20% a year.
